The acquisition, development and operation of the Oakland Nature Preserve has been accomplished entirely by volunteers and supporters. This beautiful project now serves a very important function, not only in preserving and restoring a natural piece of West Orange County, but perhaps the even more important role is educating students and adults about the natural and cultural history of this part of the world.

Public schools today have little or no formal environmental education program and people no longer spend much time in natural surroundings. The result is evident when we find students of all ages terrified to get off the pavement and into natural settings. Since these are the decision-makers of the future, it is critical that they learn to appreciate nature.

Since we do not receive government funding we must depend on volunteers and supporters at all levels to keep going. A visit to our project will prove the project is worthwhile. Our new environmental education center, built at a cost of over \$650,000 contains a museum, a classroom, office and bathrooms. Our boardwalk to Lake Apopka through forested wetlands allows us to interpret the on-going restoration of this great lake and our upland trails traverse a variety of upland habitats.

Come visit us, spend some time here, become a member or renew your membership and perhaps volunteer a few hours of your time. It will be worthwhile, I promise.

Jim Thomas
President, Oakland Nature Preserve
